

Stand

Instructions

- Print out this PDF on high quality paper.
 Do it right once and you'll never have to do it again.
 You will be dealing with sharp implements so please procede with caution.
- 2. Gather together: Scissors, X-acto Knife, Cutting Board, Glue Stick, Packing Tape, Clean Pizza Box Cardboard, 2 Thumbtacks, 1 Mechanical Pencil Erasers.
- 3. Carefully cut away the excess paper surrounding the three parts of the wheel. With the top disc, try to stay inside the black circle surrounding it without cutting into the colored areas.
- 4. Use the glue stick to affix the cutouts to clean pieces of pizza box cardboard. If desired, carefully cover with packing tape to laminate the Disc and Base (but not the Stand). Trim away excess pizza cardboard.
- 5. Use the tip of the exacto knife to poke holes in the black/white dots at the center of the Disc and Base. Remove the plastic covering on a thumbtack, if possible. Push thumbtack up through the poked hole in the bottom of the Base. Tape over the thumbtack to hold it in place.
- 6. Cut along dotted line of the Stand, removing the square space from its center. Cover with glue stick and affix to the bottom of the Base.
- 7. Use the X-acto knife and cutting board to carefully remove the white wedge on the top disk next to where it says Dragonhead.
- 8. Poke a thumbtack up through the black dot inside the arrow on the edge of the Disc, just beyond the cut-out wedge. Cut the pencil eraser in half and put half of it on the thumbtack point to protect its tip.
- 9. Carefully mount the Disc on top of the Base with the thumbtack at its center like a spoke. Put the other half of the eraser on its point to hold it in place.
- 10. Spin it around a bit and go play some Dragonhead!
